

PACTS 2020/2021 Unified Planning Work Program

Strategic Guiding Statements

Adopted April 25, 2019

Set Regional Direction for Whole Network

The Policy Committee will set the direction for funding in the MPO for the entire transportation system (roads, bike/ped, transit, land-use), prioritizing and implementing recommendations from planning and civic engagement efforts that align with PACTS goals.

Plan with a Purpose

PACTS' Unified Planning Work Program activities will to be scoped to leverage discretionary funding.

Focus on Customers

Addressing the needs of the region's people is at the core of our investment decisions. This demands a systems approach to building a transportation network. PACTS will prioritize investments of regional significance, enhancing mobility across different modes, individual agencies and municipal borders.

Drive System Efficiency

To use taxpayer dollars wisely and efficiently, PACTS will aggressively pursue opportunities to enhance efficiency across all modes, municipalities, and agencies.

Prepare for Growth

Transportation and land use planning needs to be done together, in both our near and long-range planning. PACTS will prepare for future jobs and housing growth by using high quality data, modeling and scenario planning to demonstrate the results of different land use and transportation decisions.

Expand Mobility for All

To better meet the diverse transportation needs of people with mobility challenges, PACTS will integrate mobility management solutions into our public transportation and capital improvements planning.

Communicate with and Engage the Region's Residents

Engaging the public in the PACTS decision making process strengthens projects, and increases the effectiveness of PACTS investments. PACTS will enhance its efforts to inform and engage a broad range of stakeholders and the public on transportation issues and investments.

Stay Current

Transportation is changing at a rapid rate. PACTS will stay current on autonomous and shared mobility technologies, the electrification of transportation, mobility approaches, and demographic and climate trends. By staying informed, PACTS will be more successful in ensuring our planning and investments take into account future needs and opportunities.
